No greater number of women or children than is authorized in the license shall be kept on those premises and the business shall not be carried on in a building or place not designated in the license. The license shall be kept posted in a conspicuous place on the premises where the business is conducted. A license granted to maintain a day care facility shall have on its face an expiration sticker stating the date of expiration of the

license. The secretary of health and environment shall grant no license in any case until careful inspection of the maternity center or child care facility shall have been made according to the terms of this act and until such maternity center or child care facility has complied with all the requirements of this act. Except as provided by this subsection, no license shall be granted without the approval of the secretary for children and families. The secretary of health and environment may issue, without the approval of the secretary for children and families, a temporary permit to operate for a period not to exceed 90 days upon receipt of an initial application for license. The secretary of health and environment may extend, without the approval of the secretary for children and families, the temporary permit to operate for an additional period not to exceed 90 days if an applicant is not in full compliance with the requirements of this act but has made efforts towards full compliance.

(b) (1) In all cases where the secretary for children and families deems it necessary, an investigation of the maternity center or child care facility shall be made under the supervision of the secretary for children and families or other designated qualified agents. For that purpose and for any subsequent investigations they shall have the right of entry and access to the premises of the center or facility and to any information deemed necessary to the completion of the investigation. In all cases where an investigation is made, a report of the investigation of such center or facility shall be filed with the secretary of health and environment.

(c) Whenever the secretary of health and environment refuses to grant a license to an applicant, the secretary shall issue an order to that effect stating the reasons for such denial and within five days after the issuance of such order shall notify the applicant of the refusal. Upon application not more than 15 days after the date of its issuance a hearing on the order shall be held in accordance with the provisions of the Kansas administrative procedure act.

(d) When the secretary of health and environment finds upon investigation or is advised by the secretary for children and families that any of the provisions of this act or the provisions of K.S.A. 59-2123, and amendments thereto, are being violated, or that the maternity center or child care facility is maintained without due regard to the health, safety or welfare of any woman or child, the secretary of health and environment may issue an order revoking such license after giving notice and conducting a hearing in accordance with the provisions of the Kansas administrative procedure act. If the secretary revokes or refuses to renew a license of a licensee who is a repeat, three or more times, violator of statutory requirements or rules and regulations or is found to have contributed

to the death or serious bodily harm of a child under such licensee's care, such licensee shall be permanently prohibited from applying for a new license to provide child care or from seeking employment under another licensee.

K.S.A. 65-528. Child care policy of state; desired outcome.

(a) The desired outcome of the child care policy of the state of Kansas is that families be able to fulfill their roles as primary child care givers and educators of young children by having access to high quality, affordable child care. The following principles shall guide development and implementation of state policy to achieve that outcome:

(1) Family self-sufficiency. A stable source of child care is a critical ingredient to economic self-sufficiency. Child care policies and programs must facilitate a smooth transition into the work force for parents and a rich and stable environment for children.

(2) Investment in children. Child care is a critical investment that affects a child's readiness to learn. High quality child care programs recognize and implement good early childhood practices.

(3) Consumer orientation and education. Child care policies and programs must be responsive to the changing needs of families and educate families about available options, identifying quality programs and selecting appropriate care.

(4) Accessibility. High quality child care must be available to any family seeking care regardless of where the family lives or the special needs of the child. A centralized place in local communities must be available to facilitate parents' access to child care.

(5) Affordability. High quality child care must be available on a sliding scale basis, with families contributing based on ability to pay.

(6) Diversity. It is the goal of the state to strive wherever possible to provide child care in an integrated setting where children with various needs and of various income levels and cultures are cared for together.

(7) Efficient, coordinated administration and support for infrastructure. Child care programs must be coordinated to ensure the most effective use of federal, state, local and private funds. State child care agencies and policies must support the orderly development of a high quality child care system working with local and private providers.

(b) Any state agency involved in implementing any part of the state's child care policy shall develop appropriate measures of progress toward achievement of the stated outcome under the oversight of the joint committee on children and families in accordance with K.S.A. 46-2001 et seq. and amendments thereto.
